- Façade & Shoring
- National Trust, English Heritage & Listed Buildings

If you would like to discuss your requirements, or arrange a site visit, please contact our sales team on 0845 003 90 89 or send us an email at sales@herculesgroup.co.uk.

OUTSTANDING SERVICE & SUPPORT

Hercules offers the service and technical support you need to keep your business moving forward. We have the experience, expertise and resources to plan, implement and oversee a wide range of residential, commercial and industrial scaffolding and hoist projects.

We will ensure that work is carried out to an exceptionally high standard, on schedule and within budget.

Full assistance is provided at the pre tender stage including full scaffold design drawings and calculations right through to the installation of your scaffolding and hoist requirements.

HEALTH & SAFETY

Health and Safety is the number one priority for Hercules Scaffolding. All operatives are CISRS trained and CSCS Health & Safety accredited. We are fully conversant with CDM regulations and issue Method Statements and Risk Assessments for all contracts. We hold a £10,000,000 Public and Employers Liability Insurance and a full Health and Safety Policy.

We are committed to three guiding principles:

- To achieve exceptional customer service, reliability and safety in all that we do
- To comply with all legislation and regulations
- To empower everyone – both people in the organisation and our contractors – to achieve the highest level of safety performance

CONFINED SPACE ENTRY

Hercules Scaffolding operatives are Confined Space Entry trained, both theoretical and practical, enabling the crew to work above or below ground in confined spaces using Compressed Air Escape Breathing Apparatus as part of the Planned Means of Self-Rescue. Hercules has acquired significant experience within the Water Industry and is an approved supplier to many of the main water utility providers. CSE applications include: Water, Gas, Electricity, Power Station, Underground Investigation & Maintenance and similar industrial applications.

SKIP HIRE

Hercules provides a total skip hire service for both the general public and the construction industry at very competitive prices.

PLEASE NOTE

Siting a skip on a public highway requires a permit from your local authority, and both lights and cones must be displayed at all times. Hercules will happily help arrange this as part of our all inclusive service.

Capacity (cu yard)	Height (m)	Length (m)	Width (m)
4	1.12	1.85	1.12
6	1.12	3.05	1.22
8	2.22	3.66	1.52
10	2.52	3.91	1.52
12	1.83	3.66	1.83
14	2.00	3.45	2.00
16	2.21	5.13	2.21
20	1.20	6.10	2.44
25	1.93	6.30	2.40
35	2.41	6.30	2.40
40	2.72	6.30	2.40

HAKI & C.I. FALSE ROOFS

Protection from the British weather can be a requirement whatever the time of year. Hercules, now firmly established as one of the UK's leading false roof suppliers, provides both Haki and C.I. false roofs for major refurbishments and emergency works.

The Haki roofing system has a reputation for safety, ease of erection and speed of installation. Both the Haki and C.I. systems provide an excellent dry and light working environment; this ensures continuous uninterrupted productivity during the duration of the building works.

Insurance specialists, Surveyors, Loss Adjusters and Roofing Contractors look to Hercules Scaffolding to provide a nationwide scaffolding service for emergency works. Max Rugg, Hercules Contract Supervisor for the UK, explains that a quick scaffolding and false roof turnaround is essential to reduce any further water ingress into a building following a fire or wind damage, saving thousands of pounds in further costs.

SAFETY MAN NETTING

Hercules provides Safety Man Netting as part of our all inclusive service. Safety Man Netting not only protects people working above a roof but also the people working below it. With a constantly growing emphasis on construction workers health and safety, Hercules can be called upon to supply and install safety nets nationwide. All nets conform to EN1263/1 2002 and are erected and dismantled to EN1263/2 BS5973 regulations. All of our rigging operatives hold CSCS and IPAF cards. In addition, all operatives undergo a FASET (Fall Arrest Safety Equipment Training) training course and are required to take a NVQ course before gaining their full certificate.

WORKING AT HEIGHT

HSE Work at Height Guide 2005; What You Should Know:

(Please do not hesitate to contact Hercules for advice and information on any part of this subject.)

The regulations apply to all work at height where there is a risk of a fall liable to cause personal injury. Hercules can provide you with solutions to meet all of your Work at Height requirements and obligations. We offer a wealth of experience in the provision of standard and bespoke access solutions. These might include: Electrical & Mechanical Installation, Heating & Ventilation Installation, Maintenance Work, Shop Fitting, Sign Installation, Painting & Decorating or Glazing.

Duty Holders must:

- Avoid work at height where they can
- Use work equipment or other measures to prevent falls where they cannot avoid working at height
- Where they cannot eliminate the risk of a fall, use work equipment or other measures to minimise the distance and consequences of a fall should one occur

This guide summarises the duties the HSE place on employers, the self-employed, and any person who controls the work of others (e.g. facilities managers or building owners who may contract others to work at height) to the extent they control the work.

What you must do as an employer; Overriding principle: You must do all that is reasonably practicable to prevent anyone falling. The Regulations set out a simple hierarchy for managing and selecting equipment for work at height.
